

## Emailing Photos for a Baby Foot assessment in Orthopaedic Surgery

This baby has been referred to Orthopaedic Surgery because of concern regarding the shape of their foot/feet.

In order to help us obtain a preliminary diagnosis of the baby's foot shape, and to safely and efficiently schedule the first appointment, we request that you send us photos of their feet. Please see examples below.

**At minimum, PHOTOS 1-3 of both feet MUST BE INCLUDED in the referral for clinical triage.**

Please attach to **referral or email** to [fracture.clinic@sickkids.ca](mailto:fracture.clinic@sickkids.ca) with the patient's name, date of birth, and if available hospital record number, in the subject heading.

### Instructions for Photos

1. From bottom of feet

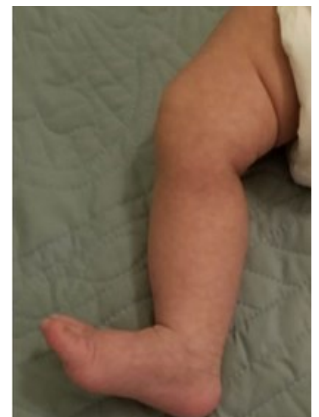

2. From back of heels

3. Side view of ankle: gently push up on the sole, towards the body.

4. From the inside

5. Soles: baby lying on their belly

6. From the front including the legs

7. From the top of the feet
