

Attaching Photographs to Referrals: Lower Extremity, Foot and Ankle

To better assess the referred patient we require **clinical photographs** of the respective **legs, feet, or toes**, **Attached** to each referral for triage.

Feet and ankles	Toe deformities	Toe-walkers
Please provide images In standing position from the front, back, in-sides and outsides, and soles of the feet, of each foot . If possible, include heels raised.	Please provide images of the top, bottom, and sides of toe deformity	Please provided images In standing of bare legs, from the front, side and back.

Referrals without photographs will be declined.

If photos are not attached to the referral in **Media**, they can be immediately emailed to fracture.clinic@sickkids.ca with the patient's name, MRN (if available), and Date of Birth in the subject line.
